Subject: Keep the current water meters!!!
Date: Monday, February 14, 2022 6:55:18 PM

Dear City Council of Sebastopol,

Thank you for skipping (passing on the lame idea to replace our current water meters which are working gloriously for 99.9% of us. I guess there are some people who feel the need for more minute water usage data and so allowing those relatively few folks to OPT-IN to get a digital meter is fine.

SMART METERS ARE BAD!!! And the majority of aware and educated Sebastopol residents do not want or need them.

I personally did the research on the smart meters that PG&E was wanting every home in it's territory... to switch over to and the findings were conclusive. The amount of EMF was ridiculously high and it was obvious the meters would be collecting and communicating (to PG&E) very detailed consumer usage information from every home with a smart meter on it.

Sebastopol was absolutely correct (divinely right even) to ban smart meters in 2013 and they are right to ban them.

Thank you for making the right decision again, on February 15th, 2022.

Sincerely,

Michael Douglas Norton

Sebastopol, Ca 95472
