

Table 1: Health Consequences of High Levels of RF Radiation

Consequences on Human Health	$\mu\text{W}/\text{m}^2$
Sleep disorders, weakness, fatigue, pain	30
Human sensation, immune system effects	100
Decreased cell growth in humans, sleep disturbances, adverse neurological and cardio symptoms and elevated cancer risk	1,000
Childhood leukemia	1,200
Impaired motor function, reaction time, memory, attention	2,500
Altered white blood cells, humans	7,500
Headache, dizziness, fatigue, weakness, insomnia, humans	10,000
Microwave hearing	30,000
Leukemia, melanoma, bladder & other cancers	50,000
Impaired memory, neurological diseases	100,000

$\mu\text{W}/\text{m}^2$ is a millionth of a Watt spread over one-square meter area
