

**Fire - Fircrest mobile
home park disaster
team,
Drought/flooding**

Drought

**Infrastructure, cell
access during
emergencies. Water
pump for City didn't
have back-up?**

What climate change impacts are you
facing or most concerned about?

**Loss of
biodiversity/extinction
as temperatures rise**

**Losing natural
beauty/ecosystems**

**Infrastructure,
backup power.
Funding is
challenge**

**Microgrid,
local
infrastructure**

How do you think we should prepare
for these climate change impacts?

**Clear
communication in
emergencies.
Website w/ info.
MYN - ham radio
communication**

**De-emphasize car use in Gen Plan.
Protected bike lanes to support biking**

<- particularly as electric bikes/etc. give more accessibility and distance to these forms of transportation

**Better sidewalks.
Morris Street no sidewalk on one side**

Education, especially in schools

EV chargers, places for bikes/scooters/skateboards to charge

What do you think the City and/or residents should do to reduce our emissions?

SCP, helping people make transition

**Diversification
of City bodies**

**EV cost
high**

**Lowering
price of
charging
EVs**

How can we make sure that all Sebastopol
community members are included in and benefit
from these efforts?

**Communication to
Latinx population,
other languages.
Financing for
low-income**

What is your vision for a carbon neutral, resilient Sebastopol?

Or, what do you want Sebastopol to look like 10 years from now?

Few cars on the road, lots of people walking/biking
