How does the City of Sebastopol Calculate Your Water and Sewer Bill?

CURRENT RATES

The City of Sebastopol bills our customers every 2 months. The water and sewer charges for the city are made up of two components, a base charge and a usage charge.

Base Charges

The base charge is determined by the size of the water meter servicing your home or business.

Water

The typical house has a ¾-inch connection and the proposed base charge for that size meter is **\$49.33** per billing cycle.

Sewer

The sewer base charge is based on the size of the water meter. The current base charge for the typical ¾-inch meter is **\$76.61** per billing cycle.

Usage Charges (1 kgal = 1,000 gallons)

Water

The usage charge is based on how much water you use. The City proposes a tiered rate structure for residential properties, and a flat rate for commercial or irrigation accounts.

Residential

Tier 1: \$4.52 / 1 kgal

Commercial

All Usage: \$4.52 / 1 kgal

Irrigation

All Usage: \$4.52 / 1 kgal

Sewer

Sewer usage is winter average/flow charge. Flow charges (winter average) are based on the lowest two months of water use between December and March of each year. (Normally wet months) when it can be reasonably assumed that all or most water entering the property is exiting as wastewater.

All Customers

All Usage: \$10.31 / 1 kgal

Sewer Calculation (1 kgal = 1,000 gallons)

The average of the lowest two months of water use between December and March is 10,000 gallons (10 cons)

Sewer Base Charge: \$76.61
