**Subject:** support "Polluters Pay Climate Superfund" legislation

Dear Council,

I ask you to support the "Polluters Pay Climate Superfund" legislation (AB 1243 and SB 684). It seems like a no-brainer to me: those that are and have made billions of dollars on oil sales but have not had to help out much in the way of consequences of the pollution of the production of the oil are due to chip in. This bill would do so much to insulate our city from the real costs of climate chaos. I also have noted the current federal administration's weakening (and possible imminent dismantling) of FEMA and aid to many of the richest corporations in this country. We 99% need help- and here is a promising idea.

Sincerely,

Kate Thompson
