Below is a picture of A&M barbecue. I remember when it was small. Very small. I asked the owner how much meat he uses in his barbecue. And I was aware that the barbecue only operates five days a week. Here is his answer: He uses approximately 48 chickens, approximately 100 pounds of brisket, and I forget how many ribs he also buys. This is weekly. This is not a "mom and pop" operation. This is a commercial operation. The smoke is in my neighborhood as well as the neighborhood on Eleanor Avenue and it is a problem. I know the city sent him a "cease and desist" order and I am following up to see whether or not A&M have complied. Since I still see the barbecue and it is still large, I have my doubts. Please let me know. And if they are not following the cease and desist order, then you need to enforce it! It's important. Thank you.
