**Subject:** Traffic Study Seems Flawed

Dear City Council, We live on Bloomfield Road South of town. We have followed and did the Survey noting it did not give an option of no change at all. Reading in the Sebastopol Times it seems that the Traffic Study was in fact more of a concept of a plan with no real quantitative analysis. And would guess it is too late to ask for your money for the survey back and do a real one? Have to wonder really what this all means. But real people and real solutions seem a minimum to ask our fine City Sebastopol.
