Subject: Sebastopol City Council~ Oct. 6 Agenda

Dear City Council,

I have lived in Sebastopol most of my life. I own a home at 446 Petaluma Avenue and I'm invested in the health of my town and neighbors.

As a breast cancer survivor, I am particularly concerned about the air quality around my house. Not only do I live with the emissions from all the vehicles driving by on Petaluma Ave., I also experience the emissions from Main St.

Now on top of the idling fumes from the traffic, I am also, now, in addition being exposed to the emissions from the two stove pipes burning at the A&M BBQ joint, one block over from my home!!

I hope you will consider the health of those of us living right in the midst of all these proven carcinogens. Are you going to choose business over our health? I ask you to think of the health of our community over the growth of businesses, especially those that disregard healthy regulations that have already been established for air quality.

Thank you for your consideration,
Sahara Chaldean
