
Calder Creek

To: Sebastopol Planning Commission

I'm writing to strongly voice my objection to the Rotary Cub's proposal to bisect Calder Creek by expanding the baseball field's surroundings.

As an 83 year old, 23 year-long resident living a block from Ives Park, I have enjoyed the park's environs and creek as a place of natural beauty and solace. I am deeply disturbed about the possibility of having it overrun by construction that serves only to disrupt the natural beauty of the place, not to mention the prolonged noise disturbance and environmental pollution during construction.

Please consider carefully. There are far better uses for any pending financial resources.

Submitted,

T.Mills
