Subject: A & M BBQ

While I understand that someone is bothered by this business' smoke, what percentage of our town's population enjoys it and stops to eat their food? This is the best BBQ I've ever had! I love the smell of the place. It's a wonderful addition to our town. You need to think carefully about how this decision might affect future business here. How do you attract and hold a successful business here in town? Aren't you already having this problem? Have you counted the large number of empty commercial spaces in town? You should bend over backward to help facilitate a business like this!
