Subject: Cell Towers are causing health problems nationwide!
Date: Friday, September 11, 2026 11:56:09 AM

I can't drive so I can't come to this mtg. but I urge you all to do the correct research and vote this down!
I am informed by friends and family all over the South, out here in the west, as well as from my doctors, that cell towers are detrimental to everyone's health, cause cancers (I am living proof, I've had cancer 4 times), and this tech needs to be stopped. Cell phones have caused many health issues, they often don't work, and they create such problems in our area because of the coastal mountains where I live. I got a call yesterday from a doctor who could not be understood because of the cell phone irregularities. The tech is not good, not effective, and is dangerous. My son had a tumor on his neck from the use of a cell phone.

It is so important to stop this tech and figure out if some new "invention" actually works and causes no harm before the public is asked to buy it!! I have sensitive hearing and I can hear the hum of these destructive towers. No one wants this poisonous horror near them but unfortunately too many people watch the TV "programming" and believe the "authorities".

I also shop in Sebastopol, though I live up the coast from Jenner, and the towers are really a harm to everyone. Every time I come in to Sebastopol, I see more evidence of this criminal tech and am appalled. It is hard to even walk around the town due to the hum and energy field. Fix the problem or our children, grandchildren and future generations will wonder what was wrong with us.
